SPECIFICATION AMENDMENTS

Please amend the specification as follows in accordance with the Revised Format of Amendments under 37 C.F.R. § 1.121.

1. At page 4, please replace the paragraph beginning at line 16:

~~Connection 24~~ Connection 23 joins data storage device 12 with form engine 14. Once again, any form of ~~connection 24~~ connection 23, hardwire, wireless, or the like, is appropriate. Hereto, data storage device 12 and form engine 14 may in fact reside on data input device 22 or be remotely connected, as is known in the art.

2. At page 7, please replace the paragraph beginning at line 6:

In operation, in a system for creating documents from processed data 18, data storage device 12 is provided for storing processed data 18. Processed data 18 is added to data storage device 12 by means of connection 20 from data input device 22. Form engine 14 is connected to data storage device 12 by means of ~~connection 24~~ connection 23. Form engine 14 formats processed data 18 in accordance with predetermined high level rules 24. Form engine 14 is connected to output device 16 by means of connection 34. Output device 16, in a preferred embodiment, prints out formatted document 36. Formatted document 36 is simply and easily conformed by high level rules 24 so that, for example, photo 38 is proportional with text 40. Importantly, sub level rules 44 are provided for loose value trade-offs 26 for an even greater stylistic control of formatted document 36. The invention is applicable to a wide spectrum of formatting environments, including but not limited to, printers, web pages, electronic documents, and the like.
